

Your mission: To create a constellation about food and compose an 8-measure melody to reflect that constellation. Afterall, Mrs. Werner sees food everywhere she looks!

Step 1: Choose a food you have in front of you (or your favorite) and create the story of the constellation. Summarize it here:

Step 2: Identify adjectives that you feel describe the character of the constellation, as represented in the story, and list them here:

Step 3: Identify ways to convey those adjectives musically - for example, if the character of the constellation is evil, you can have the music loud, accented, etc. List the musical aspects you can use in your composition.

Step 4: In your sidewalk square with chalk, write a short 2-8 measure composition in 4/4 time to represent your constellation. Include dynamics and articulations to enhance your constellation, and be ready to explain your musical choices and how they represent your constellation. Call me over to play it for you! If you have time, draw what your constellation may look like, too!
