

The Planet Distances in Our Solar System

Student Name: _____ Date: _____

Planet	Distance from the Sun (Astronomical Units, miles, and km)
Mercury	0.39 AU, 36 million miles 57.9 million km
Venus	0.723 AU 67.2 million miles 108.2 million km
Earth	1 AU 93 million miles 149.6 million km
Mars	1.524 AU 141.6 million miles 227.9 million km
Jupiter	5.203 AU 483.6 million miles 778.3 million km
Saturn	9.539 AU 886.7 million miles 1,427.0 million km
Uranus	19.18 AU 1,784.0 million miles 2,871.0 million km
Neptune	30.06 AU 2,794.4 million miles 4,497.1 million km

Tip: To make your 1-page model of the solar system, highlight the AU distance the planet is found from Earth. Remember to round your figure to the nearest 0.1 when you mark your measurement!
